

## Ball Mounts

The Fastway® Flash™ aluminum locking ball mounts are the best looking and most secure you can buy, with the maximum theft protection and stunning good looks.

The LBM's integrated lock pin system is a big step up in both security and convenience from a traditional locking hitch pin, because it cannot be snapped off, and because there is no separate hardware to mess with – it's all built right into the hitch.

Each ball mount is precision-machined in the Mountain West, making it stronger and longer-lasting than any other aluminum ball mount. When you buy a Fastway Flash locking ball mount, you are buying the best quality available, built by people who take pride in their work, right here in America.

Fastway® Flash™ Adjustable Locking Ball Mounts give you lightning-quick adjustments, maximum theft protection and stunning good looks. The dual hitch balls make towing different trailers a snap and offer superior strength and hand-polished shine.

Shhhhh! You'll never believe how quiet an adjustable ball mount can be until you use the Fastway® Flash™ Solid-Tow™ adjustable ball mount. It virtually eliminates hitch noise, using an internal mechanism to secure the shank in the receiver, and the hitch ball holder to the shank. Its sleek design and hand-polished aluminum will get your truck noticed, and its adjustable height and dual hitch ball make it an excellent choice for towing.
