AG-16036-C 36" Line

AG-16048-C 48" Line

AG-16072-C 72" Line

AG-16120-C 120" Line

Note on Corrosion Resistance:

The best corrosion protection is provided by the AG (aluminum/galfan) coated tubing. The AG tubing is the current standard used in the automotive industry (all stocked part #'s use the AG coating including the 0104-004).

For severe corrosion applications, such as salt water immersion, 3/16" O.D. stainless tubing is available—(use part #'s S-100SA or S-200TA)
