Resilient rubber core isolates and absorbs damaging road shocks before they are sent to the trailer's frame and contents. Delivers smoother towing than traditional leaf spring suspensions. Retrofits to existing leaf spring suspensions by replacing the standard steel equalizer.

- B 5.25"      A 3"**

Resilient rubber core isolates and absorbs damaging road shocks before they are sent to the trailer's frame and contents. Delivers smoother towing than traditional leaf spring suspensions. Retrofits to existing leaf spring suspensions by replacing the standard steel equalizer. Unlike competitive products, E-Z Flex does not change the ride height of the trailer. Easy installation requires no welding, grinding, or cutting of the trailer frame or hangers. Available in 33" and 35" sizes for use on double axle trailers.
