

51140 TRIFLEX

Triple-axis motion sensing for highly responsive, smooth stops
Compact size Automatic leveling and calibration - No setup required
Automatically adjusts brake output when going up or down a hill
Sensitivity adjustment for varying trailer loads or driving conditions
Compatible with anti-lock brakes and cruise control
Operates 2-8 brakes
***HARNESSES ON PAGE 66**

Electronic Trailer Sway Control*

The Sway Master trailer hitch sway control system is state-of-the-art technology. Reduces sway with or without weight distributing hitch
 Upon detection of sway, unit provides simultaneous braking to all trailer brakes on 1 to 4 axle trailers
 Utilizes solid state gyroscope to detect sway and GPS to determine trailer speed
 -System activates at specified speed
 -System detects sway and varies braking force based on speed
